

# See how it works: Travel Agencies

## Travel agency website

### Travel booking

The customer orders a trip through your app or website and enters payment information.

## Wallester platform

### Virtual card issuance

The virtual card is issued to pay for accommodation, transportation and other travel-related expenses.

## Travel service providers

### Funds debited

The Virtual Card is used by travel service providers just like any other VISA card.

**VISA**

### Expense estimation

The expense estimation system permits to minimize the risk of fraud and guarantee that the funds are used for the intended purposes only.

### Funds Transfer

Funds are instantly transferred to the card in real time once the transaction is confirmed.

### Authentication request

Wallester platform connects to the network required for authentication.

### Transaction completion

The authorization is successful and the payment is confirmed.

### Notification Receipt

Thanks to Wallester notification interface, your customers receive transaction notifications in real time.
